

ASSESSMENT GUIDE

Unit Code: ITEC634 Web and Mobile Application Development, Semester 1, 2026

Assessment 3 – Mobile Website Development Project

Assessment Artefact: Website code and report

Weighting [40%]

Why this assessment?

- The purpose is to assess students' fundamental skills in dynamic website development by applying appropriate technology.

What are the types of employability skills that I will acquire upon completion of this assessment?

Skill Type	
Developed critical and analytical thinking	☒
Developed ability to solve complex problems	☒
Developed ability to work effectively with others	☒
Developed confidence to learn independently	☒
Developed written communication skills	☒
Developed spoken communication skills	☐
Developed knowledge in the field study	☐
Developed work-related knowledge and skills	☒

Assessment Overview:

Purpose, as written in the EUO

Due date:	5pm on Friday of Week 12 – a tentative date subject to change from the university central examination
Weighting:	40%
Length and/or format:	Packaged project code with report
Learning outcomes assessed	LO3, LO4
Graduate attributes assessed	GA3, GA5, GA8
How to submit:	Task submission – via CANVAS
Return of assignment:	Via CANVAS
Assessment criteria:	Rubric: see end of document

Context

Students are first required to develop a **professional**, dynamic, data-driven website. The website will demonstrate the use of HTML, CSS and ASP.NET, including user input validation, error handling, **server-side authentication**. On top of it, students will further develop a responsive, mobile-friendly website, by using frameworks such as Tailwind CSS. Mobile websites should be responsive when accessed on different devices. This is useful for assisting disadvantaged populations. Students are also required to write a report with screenshots to demonstrate the operations of their websites.

Instructions

In this **individual** assessment, you will demonstrate that you can develop a dynamic and mobile website (25%) with responsive design and report your workings and understandings (10%). Also, you will need to provide a few enriched features of the website (5%) up to your own design and choice. The details are as follows.

- The choice of business for the website can be chosen by the student in consultation with the lecturer/tutor. It is required to specify the functionalities and layout of the website and apply images and media.
- The website must have a consistent look and be easy to navigate.
- The design should follow the Responsive Design context.
- You need to design a layout for PC and mobile views.
- The website should be responsive when accessed on different devices, different browsers, different resolutions.
- Feel free to enrich the (mobile) website design and functionalities or you can even turn the website into a simple Android mobile app at your discretion.
- You are required to write a few-page report **with screenshots** to introduce all operations of your developed website and the corresponding parts of the code that implements any operation. In the report, you should explain the Responsive Design concept and how you are using the framework(s) you have used to implement the responsive design. You also need to discuss any considerations or techniques used for the specific design issues and how similar mobile web applications (possibly using different web and mobile development frameworks) can assist poor or vulnerable populations – this can be open-ended where references are encouraged.
- **Create a presentation** explaining your work, record a video of your delivery (maximum 5 minutes), and upload the video file to Canvas.

How do I submit?

Via CANVAS

Who can help me?

Studiosity

Academic Skills Unit (ASU)

I'm having problems

Extensions are generally not granted for the final assessment. However, if there are compelling reasons you may apply to the Lecturer in Charge via email and provide a copy of your filled-out form and your supporting evidence.

- **Apply for an extension** (must normally be submitted at least 24 hours prior to the due date)

An extension for Assessment 1 may be considered for students who have personal circumstances such as prolonged and serious illness that significantly hampers their participation or performance in an assessment task. Appropriate evidence and documentation need to be provided along with the [EX form](#).

- **Apply for a special consideration**

A special consideration application is considered when your participation in an assessment task or other assessable activity has been significantly hampered by exceptional and unforeseen circumstances beyond your control and where other processes are not applicable or are no longer possible because of the timing and/or severity of the circumstances. Appropriate evidence and documentation need to be provided along with the [SC Form](#).

Criteria

The full criteria are compiled in a rubric, which can be found on the following page.

Rubric for Assessment 3 – Mobile Website Development Project (40%)

Learning Outcomes	Criteria	Standards				
		Below Expectations	Meets expectations		Exceeds Expectations	
		NN (0-49)	PA (50-64)	CR (65-74)	DI (75-84)	HD (85-100)
GA5 LO3, LO4 Weight=15 marks TL=4 Learning stage=A	Demonstrate skills in applying technologies and knowledge to complete functionality for complex websites.	Fail to demonstrate skills in applying technologies and knowledge to complete functionality for complex websites. (0 – 7.35)	Adequately demonstrate skills in applying technologies and knowledge to complete functionality for complex websites. (7.5 – 9.6)	Credibly demonstrate skills in applying technologies and knowledge to complete functionality for complex websites. (9.75 – 11.1)	Distinctively demonstrate skills in applying technologies and knowledge to complete functionality for complex websites. (11.25 – 12.6)	Highly distinctively demonstrate skills in applying technologies and knowledge to complete functionality for complex websites. (12.75 – 15)
GA8 LO3 Weight=15 marks TL=5 Learning stage=A	Demonstrate correct design and application of techniques on responsive layout, data displaying and data updating.	Fail to demonstrate correct design and application of techniques on responsive layout, data displaying and data updating. (0 – 7.35)	Adequately demonstrate correct design and application of techniques on responsive layout, data displaying and data updating. (7.5 – 9.6)	Credibly demonstrate correct design and application of techniques on responsive layout, data displaying and data updating. (9.75 – 11.1)	Distinctively demonstrate correct design and application of techniques on responsive layout, data displaying and data updating. (11.25 – 12.6)	Highly distinctively demonstrate correct design and application of techniques on responsive layout, data displaying and data updating. (12.75 – 15)
GA3 LO4 Weight=10 marks TL=5 Learning stage=A	Demonstrate professionalism of mobile-friendly website development through implementation and reporting	Fail to demonstrate professionalism of mobile-friendly website development through implementation and reporting. (0 – 4.9)	Adequately demonstrate professionalism of mobile-friendly website development through implementation and reporting. (5-6.4)	Credibly demonstrate professionalism of mobile-friendly website development through implementation and reporting. (6.5-7.4)	Distinctively demonstrate professionalism of mobile-friendly website development through implementation and reporting. (7.5-8.4)	Highly distinctively demonstrate professionalism of mobile-friendly website development through implementation and reporting. (8.5-10)
